

21st Century Playback

stello
CDA500

Hear the hidden beauty of your recordings with the CDA500.
More versatile than any stand-alone disc player, it's your vehicle to musical ecstasy.

APRIL MUSIC debuts Stello CDA500 Component

Downloads are everywhere, but the compact disc is also here to stay. The Stello CDA500 accommodates both formats with ease. A superb CD player, the CDA500 features a top-loading mechanism for trouble-free operation. Electronic highlights include upsampling to 192kHz, and compatibility with both "Red Book" standard CDs and CD-Rs. A full bank of analog and digital inputs and outputs means that the CDA500 will fit into any kind of home entertainment system, be it old-school analog or cutting-edge digital.

USB connectivity means the CDA500 can communicate directly with your personal computer, elevating your archived audio files to CD quality. The PC is a fantastic tool and ultra-convenient portable library, but it lacks refinement as an audio playback device. You will be amazed at how good computer audio can sound when processed through the CDA500's state-of-the-art Digital-to-Analog converter.

Stello CDA500 (CD Player + D/A Converter)

Top-loading Mechanism for Best CD Playback
