

2-160 Two-Channel Amplifier

Whether you are looking for a high-powered two channel amp for use in a single zone or want to expand your home theater from five to seven channels, the 2-160 is your solution amp.

Utilizing two of the same robust modules we include with our monster seven and five channel amps, you can count on unequalled performance in a small footprint. The heavy duty toroidal transformer delivers earth-shaking bass and yet is capable of producing detail that will astound you.

The flexibility of the 2-160 is remarkable. With a preamp in/out function you can “daisy chain” several of these amps.

Also included is an intuitive level control function to contour the music to your particular taste.

Like every Sherbourn amp, the 2-160 is designed and manufactured to the highest standards imaginable. Sherbourn is renowned for its reliability as well as its musicality.

At Sherbourn we design our entire award winning product line with a passionate dedication to innovation, reliability, power and performance. You should expect nothing less.
