

## PRE-1: Remote Controlled Stereo Preamplifier

In a world of digital bliss, now comes an analog preamp from Sherbourn that will amaze and delight the most exacting audiophile. After all, music is at the heart of every system and the PRE-1 is the perfect component for critical listening.

We have even included a moving coil/moving magnet phono circuit for you to dust off those treasured vinyl albums and enjoy hours of musical nirvana.

You can use the PRE-1 with the PT-7020A processor by utilizing the home theater bypass switching. In stereo the PRE-1 acts as a preamp. Use the HT bypass mode and the PRE-1 becomes a passive component connection for your processor, allowing it to control subwoofer, left and right channels.

The PRE-1 one also features a fully integrated bass management system. High pass/low pass inputs allow you to cut off from 50Hz to 250Hz.

We even provide a headphone output for personal listening.

Like every Sherbourn product, the PRE-1 is designed and manufactured to the highest standards imaginable. Sherbourn is renowned for its reliability as well as its commitment to producing the most musical components possible.

At Sherbourn we design our entire award winning product line with a passionate dedication to innovation, reliability, power and performance. You should expect nothing less.

## SPECIFICATIONS: PRE-1 Remote Controlled Stereo Preamplifier

Carton weight	15 lbs.
Rated power	9v RMS with no more than 0.05% THD from 20 Hz – 20KHz
Frequency response	5Hz-80KHz
Gain	30dB
Signal to noise ratio	116 dB (ref 2v)
Input impedance	47 K ohms +/- 5%
Maximum line out level	9 volts RMS
Channel separation @ 1KHz	>80 dB
Ground floor noise level	>20uV
Power supply	120v/60Hz or 230v/50Hz (selectable)
Phone input	Moving coil, 240 Ohm, Moving magnet, 47 kOhm
Filters	High pass, variable 5kHz-15kHz @12dB per octave Low pass, variable 50Hz-250Hz @12dB per octave
Dimensions	17.7" W x 14" D x 4.25" H
